TEK4GOV

Our mission is to help government organizations realize their program delivery objectives through digital services.

WHY CHOOSE US?

Our service areas are designed to provide modern technology options that work well together, including Amazon Web Services, Salesforce, Tableau, and open-source software development. We bring decades of experience and focus on a core set of technologies to deliver implementations based on best practices and continual investment in your staff with training and education.

OUR SERVICES

CLOUD INFRASTRUCTURE

Implementations that result in resilient, cost-effective, and secure cloud-based systems using AWS infrastructure and platform services. Infrastructure as code paired with DevSecOps provides sustainability and client self-sufficiency.

APPLICATION DEVELOPMENT

Full stack engineering capabilities incorporate the latest open-source languages and platform technologies to create systems that achieve business objectives and reduce costs.

SALESFORCE IMPLEMENTATION SERVICES

With a focus on rapid implementation and process automation, our job is to get you moving quickly and efficiently so that you can focus on your business.

INFORMATION SECURITY

Achieve security and compliance with a focus on efficient business operations. We bring expertise in key compliance areas, including HIPAA and NIST SP 800-53Rev5, combined with AWS security automation experience.

BUILT ON TECHNOLOGY.

FOCUSED ON PEOPLE.

ABOUT TEK4GOV

Headquartered in West Sacramento, we are a certified California Small Business with the Department of General Services. Through our combination of public sector domain knowledge and technical expertise, TEK4GOV provides customers with architectures that realize business/program objectives with the most appropriate technology solutions. Our team has business domain knowledge across public sector programs with a specific focus on Health and Human services, including: Child Welfare, Eligibity and Public Health.

We combine TEK4GOV's business understanding with our cross-technology expertise and reference architectures to build systems that reduce time to value, using AWS platform services and low code technologies. Our objective is to establish a long-term relationship with the organizations we support. We collaborate with customers regularly to gain feedback, establish awareness and resolve the challenges of implementing complex projects. Our engineering and development practices ensure quality, consistency, and resiliency through practices including peer reviews, automated testing, and CI/CD automation.

CUSTOMER SUCCESS

California Secretary of State

Daily mail forwarding operations were reduced by **30%**

Automated Workflows and batch processing reduced application processing time by **20%**
